

★Carefully read and follow the instructions.
★In rare cases, hair colors can cause severe allergic reactions.
★Be sure to perform a skin allergy test (patch test) before each use.
DO NOT USE this product if you have ever experienced irritation caused by a hair color product.

Cautions

1. DO NOT USE this product if any of the following apply.

- You have ever experienced irritation caused by a hair color (including this product or another product)
- You have ever experienced hives (itching, rash, redness) or become sick (difficulty breathing, dizziness, etc.) during or after using a hair color
- You felt a problem with your skin after performing the skin allergy test (patch test)
- Your scalp or skin is sensitive (during or while recovering from an illness, during menstruation, while pregnant, etc.)
- You have swelling, wounds or a skin condition on your head, face or neck
- You have a history of kidney disease or blood disease
- You continue to experience poor health conditions (slight fever, fatigue, palpitations, shortness of breath, purpura, frequent bleeding, extended menstruation, etc.)

2. Precautions before use

- Before each use, make sure to perform a skin allergy test (patch test) 2 days (48 hours) in advance in accordance with the instructions on the right.

The purpose of a patch test is to see whether hair color causes irritation to your skin. Observe the test area twice, approximately 30 minutes and 48 hours after applying the tester. Even if you may have colored your hair many times before without experiencing any irritation, changes in body conditions may cause irritation to occur. So, perform a patch test, without fail each time.

- Do not use the product for purposes other than head hair coloring. This product is intended for use on head hair.
- Do not use on eyebrows or eye lashes as the cream may come into contact with your eyes.
- Do not use the product immediately after shaving your face as your skin might have fine scratches and be sensitive.
- Avoid perming within one week before or after use as this may damage your hair or cause the colorant to come off.

3. Cautions during use

- Start application immediately after mixing the creams.
- Use the product in a well-ventilated area.
- Make sure to wear the gloves included in the box.
- Do not bathe during use or wet your hair before use as the cream mixture may get into your eyes by being carried in sweat or droplets.
- Avoid getting the cream mixture on your face, neckline, etc. Immediately rinse off with water if the cream mixture gets on skin.
- Pay attention not to let the cream mixture or its rinsing water get into your eyes. If the cream mixture or its rinsing water gets in your eyes, the eyes may experience severe pain or, in some cases, be damaged (cornea irritation, etc.). If the product gets in your eyes, do not rub, and rinse well immediately with plenty of cold or warm water for at least 15 minutes and immediately consult an ophthalmologist.
- If you experience any skin problems such as rash, redness, swelling, itching and severe irritation, hives, difficulty breathing, dizziness or other symptoms during use, rinse off the cream mixture well immediately and seek immediate medical attention.
- If you experience any problem after use, make sure to consult a doctor.

4. Cautions for handling

- The unused cream mixture will lose its effect. Make sure to rinse and dispose of the bottle.

5. Storage precautions

- Keep the product out of reach of infants or young children. There is a risk of accidental ingestion.
- Store the product away from high temperatures or direct sunlight.

* Do not use the product on infants or young children.
* Carefully select the place to store the product in order to prevent people with dementia and others from accidentally swallowing the product.
* Pay close attention while using the product to see if your skin experiences problems.
Stop using the product and consult a dermatologist if it does not suit your skin, if you experience redness, swelling, itching, irritation, loss of color (e.g. white blotches) or darkening during use, or if the above conditions appear after your skin is exposed to direct sunlight. Continued use may worsen these symptoms.

DO NOT USE this product if you have ever experienced irritation caused by a hair color product.

- You have ever experienced irritation caused by a hair color product
- You experienced a skin reaction in the patch test

Risks of developing allergy caused by hair color

Hair color induced "irritation" includes itching, swelling, redness, bumps and other symptoms on the head, roots, face, neck and other parts of the skin. Some people may only experience itching. If you repeatedly use the product because you have not noticed irritation or because the symptoms are mild, or after the symptoms disappear, they may become more severe each time. In rare cases, this may lead to sudden occurrence of a severe allergic reaction called "anaphylaxis", which involves systemic hives, breathing difficulties, etc., that can be dangerous. DO NOT USE this product if you have experienced any of the above mentioned types of irritation.

How to conduct the Skin Allergy Test (patch test)

The purpose of a patch test is to see whether hair color causes irritation to your skin. Even if you may have colored your hair many times before without experiencing any irritation, changes in body conditions may cause sudden irritation to occur. So, perform a patch test without fail each time, 48 hours before use.

1. Have the following items ready.

2. Make the mixture for patch testing.

- Uncap the Cream 1 tube and pierce its opening using the protrusion at the top of the cap. (Screw in thoroughly) Squeeze out a drop of cream about the size of a red bean (diameter of 5 mm) onto the tray.
- Then squeeze out the same amount from the Cream 2 tube.
- Mix with a cotton swab.

3. Apply mixture onto inner side of arm and leave it on for 48 hours.

- Take the cream mixture on the cotton swab. Thinly apply an amount equivalent to 1 coin with a diameter of 2.5 cm on the inner side of the arm and let it dry naturally.
- Leave it on for 48 hours without touching. (It is important to leave the spot on for 48 hours) Do not cover the test area with a bandage, etc.
- The part of your skin on which you have applied the product may become brown, but it will disappear a few days after the patch test through regular bathing.
- Avoid staining clothes while the cream mixture dries.
- If the applied spot does not dry within 30 minutes, lightly wipe off with tissue paper, etc.
- For accurate results, do not wet, rub or put a bandage on the test area for the next 48 hours. Keep bathing and showering to minimum during the test. When unavoidable, avoid wetting the test area.

4. Observe the test area twice. (Approximately 30 minutes after the application and 48 hours after the application)

- If rash, redness, itching, blisters, irritation and other skin problems develop in the test area, do not rub with your hands. Wash off test mixture immediately and DO NOT use this product.
- If any of the above mentioned reactions are noticed during the test period, even if it is before the end of 48 hours, STOP TEST immediately. Wash the cream mixture off and DO NOT use this product.

5. Proceed to use the product only if you have not experienced any problems during the 48 hours.

If you experience any problem caused by the patch test, consult with the following contact regarding skin conditions and the product.

Preparations before Application

〈Required items〉

Items included in the box

Items not included in the box

Getting your hair ready

- Shampoo by the day before use. If the hair is visibly dirty or has a large amount of hair styling product, temporary hair color (coloring foam, hair mascara, etc.), or metal powder, etc. on it, thoroughly rinse off while using caution to avoid hurting the scalp.
- When it is unavoidable to shampoo on the same day, dry your hair before use. Wet hair may cause the colorant to drip or reduce its effect.
- Perming after use may cause the colorant to come off. Avoid perming within one week before use.
- If your hair is long or permed, it is recommended to comb your hair before use to prevent tangling.

- Change into clothing you don't mind staining and wrap a towel around your neck.
- Thinly apply oil-based skin cream (e.g. NIVEA cream) to your ears, forehead, neckline and other hairline areas so you can easily remove the cream mixture in case it gets on your skin. Avoid getting the oil-based skin cream on your hair as this may reduce the coloring effect.
- If the cream mixture gets on your skin, immediately wipe off with a cotton pad or tissue paper wet with water, etc.

- In cold places, hair may be difficult to color. Use in places with a warm temperature (20°C or more).

- Avoid use if you have an important upcoming event. It is recommended to use the product two to three days beforehand in case it stains your skin.
- Take off glasses, contact lenses, earrings, necklaces, rings, etc.
- Place newspaper, etc. on the floor before use to prevent staining. (Stains may not come off)
- Do not use the product while bathing.
- Do not use metal combs or hairpins.

- Do not mix the product with products of different color numbers or names. Mixing two different colors does not create the intermediate color.

★ Handle the cream mixture with care to avoid staining of clothes, floors, carpets and walls, as stains may not come off.

How to use

One box is for a single use for medium to shoulder length hair.

Make sure to perform a patch test before each use in accordance with the instructions on the back. Make sure to read "Preparations before Application" on the back.

Tips for beautiful results /

Application order

① Front half ▶ ② Back half ▶ ③ Entire hair again

①②③ It is recommended to make the cream mixture before each step.

Appropriate usage amount

① 40% ② 40% ③ 20%

If you apply cream mixture only to the root part, only that part may be brighter. Apply a generous amount of cream mixture from the roots and spread it towards to the ends.

1. Prepare the cream mixture just before using.

※Color of the cream mixture does not reflect the final hair color result. It may become a dark purple or brown shade, but this does not affect the final hair color result.

★ Assemble the 3-in-1 Comb Brush firmly.

※Once assembled, it cannot be disconnected.

① Put on the gloves.

② Squeeze out equal amounts of Cream 1 and Cream 2 on the tray.

③ Use the Brush part of the 3-in-1 Comb Brush to mix it well.

Tips for using the 3-in-1 Comb Brush

1. Divide your hair from the roots with the tip of the 3-in-1 Comb Brush and use the Brush part to apply cream mixture to the roots of the hair-section.
2. After applying the cream mixture on your entire head, spread cream mixture over entire hair using the Comb part,

★ Start application immediately after mixing the creams. The cream mixture starts losing its effect after 30 minutes.

- ★ Cream 1 may come out in black or brown towards the end. The tip of the Cream 1 tube may turn dark before the next use. However, neither case of discoloration affects the coloring effect.
- ★ After use, tightly recap the tubes with the correct caps. The pink cap is for Cream 1 and the white one for Cream 2.

2. Apply the cream mixture to your hair.

※If the cream mixture comes into contact with the hairline or ears, immediately wipe off with damp tissue paper, etc.
 ※Use caution to avoid scratching your scalp with the comb.

Within 20 minutes

① Using the Brush part, apply the cream mixture to the front half of your hair.

Use approximately 40% of the total.

Start application in areas with visible gray.

- ① Divide your hair using the tip of the 3-in-1 Comb Brush. Take the cream mixture onto the Brush part and apply to the root area.
- ② Then, apply the cream mixture through from the middle to the ends.
- ③ Take another section of your hair (about 2cm width) and repeat the steps ① and ②.

② Using the Brush part, apply the cream mixture to the back half of your hair.

Use approximately 40% of the total.

Start applying to the nape of your neck.

Using the tip of the 3-in-1 Comb Brush, section your hair from the nape up to the top of your head. Apply the cream mixture from the roots and spread it towards the middle and then to the ends.

③ Apply more cream mixture over the entire head and spread using the Comb part.

Use approximately 20% of the total.

Apply more cream mixture over the entire hair. Using the Comb part, thoroughly apply into your entire hair.

Ensure not to comb away the cream from your hair. Use caution to avoid hurting your scalp or hair.

Finally, touch up areas with visible gray such as the hairline and parting areas.

20 - 30 minutes

④ Let it develop for 20 to 30 minutes.

Q Are areas other than your hair free of the cream mixture?

Wipe off any cream mixture found on your face, ears, nape of your neck, or arms.

※Over time, it becomes harder to remove the stain.

It is recommended to let the cream develop for 30 minutes if the following applies.

※Your hair is difficult to color (coarse, thick hair, etc.)

※The actual color of the finish, or gray hair coverage result, depends on the original hair color, hair type and volume of gray.

3. After the development time is up, rinse well, then shampoo and condition.

Shampoo your hair twice, more thoroughly than usual.

- Use caution to avoid the cream from getting in your eyes while rinsing off.
- If your hair is visibly damaged, it is recommended to use the Rinse-off Treatment included in the box.

- ★ Thoroughly dry your hair.
- ★ Use caution to prevent color transfer to clothes, hats, pillow cases, etc. if the following applies.
 - Your hair is wet. (after sweating profusely, rain, swimming, hair washing, using hair products, etc.)
 - Your hair is covered in large amounts of hair restorer, hair foam or other hair products.
- The unused cream in the tube can be used as it is next time. Tightly cap the tubes for storage.
- It is recommended to limit use to once a month to avoid damaging your hair.

Caution! The unused cream mixture will lose its effect. Make sure to rinse and dispose of the bottle.

How to apply the cream mixture for root touch-ups.

Make sure to also perform the patch test each time including from the second time and onward.

Tip

※Starting application in areas that are already colored may result in a darker finish. Start application from new root areas and spread the cream mixture to the middle, rather than starting from the hair ends.

Within 20 minutes

① Apply to the newly grown part and middle of your hair using the Brush part.

Apply a generous amount of the cream mixture at the roots to middle of the new hair.

10 - 20 minutes

② Let it develop for 10 to 20 minutes.

It is recommended to leave the cream mixture on for 20 minutes if the following applies.

※Your hair is difficult to color (coarse, thick hair, etc.)

Within 10 minutes

③ Spread over the entire hair using the Comb part.

For an even-toned finish, comb the cream mixture from the root area all the way to the ends, spreading it over your entire hair.

Around 10 minutes

④ Let it develop for approximately 10 minutes.
