

Instructions for Use

Carefully read to the end and follow the instructions to use.

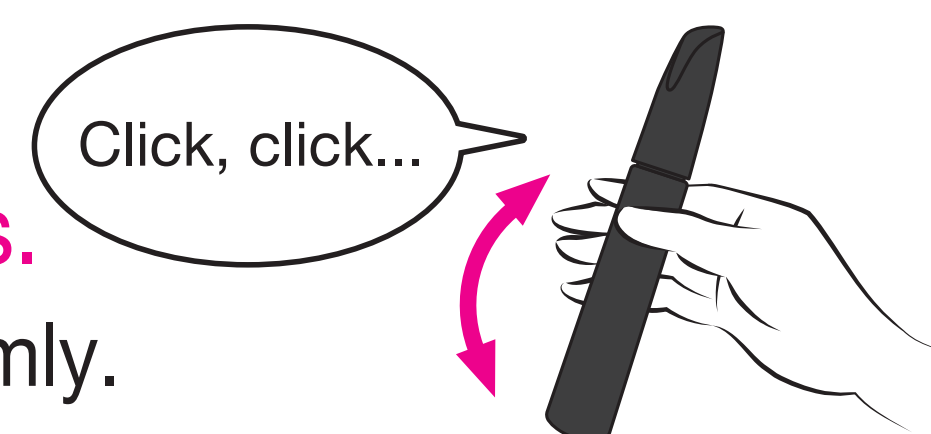

Precautions before use

※ Be sure to read the cautions on the outside of the package as well.

- Make sure to use on dry hair. Using on wet hair will result in poor color application.
- Do not use styling products on the area of use. Using of these products may result in poor color application or cause the colorant to come off.
- Do not use on hair that touches the collar or shoulders. The collar may be stained.

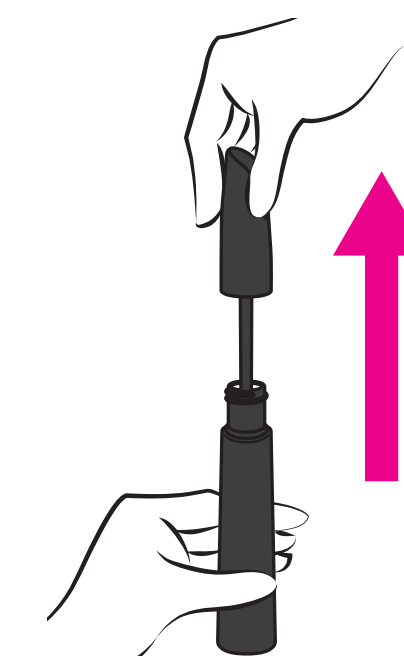

How to use

- 1 Shake well before use so that the liquid mixes well. With the cap closed, **shake about 10 times until you hear clicking sounds.**
※ If there is no sound, open and close the cap two or three times and shake it firmly.

- 2 While holding the container upright, loosen the cap and pull the brush **slowly and straight out.**

- Caution**
- Opening the cap or pulling out the brush while the container is tilted on its side may cause liquid to spill out.
 - If the brush is pulled out too quickly, liquid may splatter.

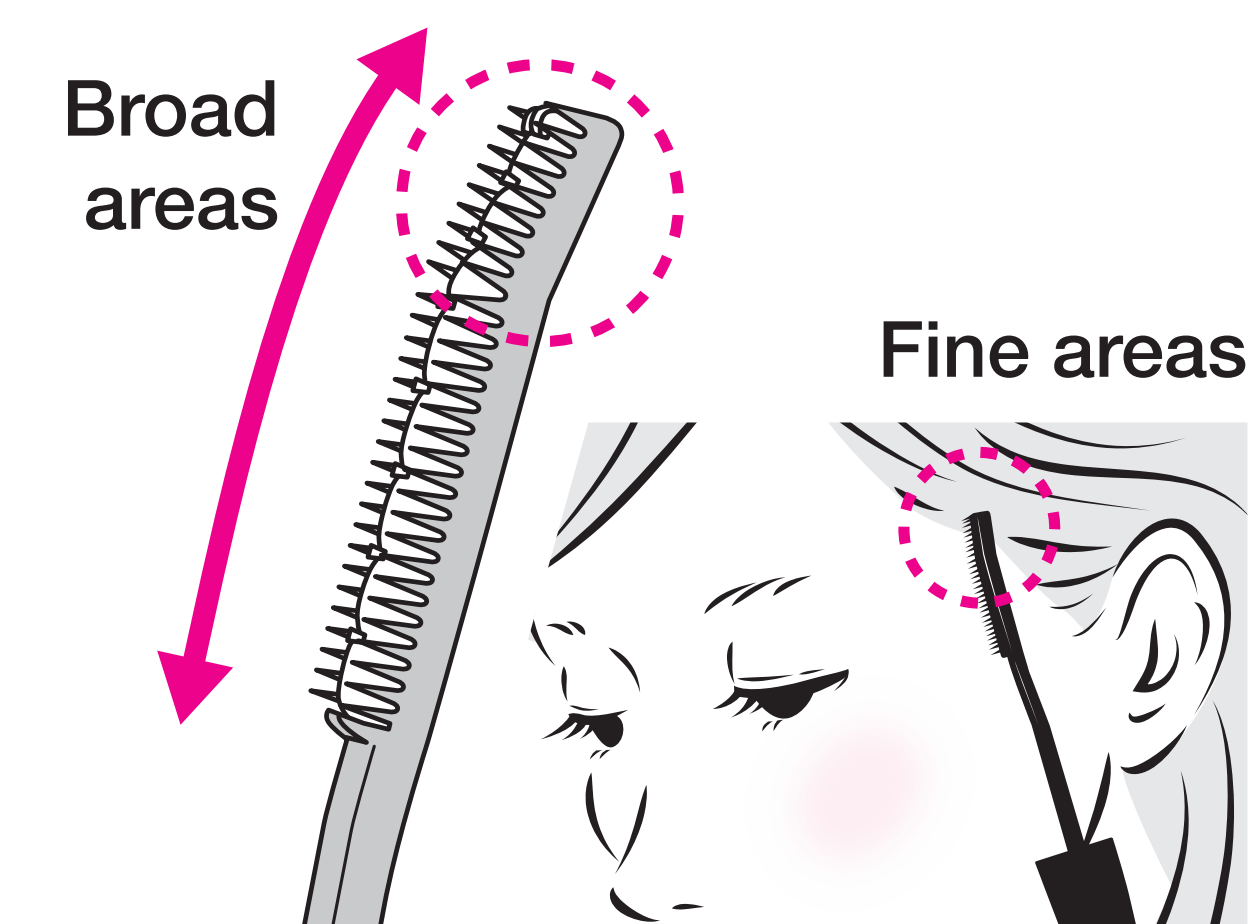

- 3 Apply the appropriate amount on the hairline and parting, where gray hair is visible. If liquid is insufficient, insert the brush again **to the bottom of the container** and saturate.

※ If hair is not colored sufficiently, it may be because the liquid is not mixed properly. **Close the cap tightly and shake well before use.**

- Caution**
- Do not touch until dry.
 - Pay attention not to get the product onto the scalp or skin. If the product gets on skin, wipe off with damp tissue paper, etc.

- 4 After use, **close the cap tightly** to prevent the contents from spilling or drying out.

How to use the Special Long Brush effectively

Tip! For fine areas, use the curved tip for a neat application.

Tip! Hold hair with your hand so that you can apply the product thoroughly and neatly from the roots.

Cautions after use

- After drying, do not rub forcefully or comb or brush the area on which the product has been applied. Color may flake off in powder form.
- Please note that rubbing the area where the product is used while your hair is wet from sweat, rain, washing your face, etc., may cause color to transfer and stain your hands, clothes, towels, etc.
- Sleeping with the product on hair may stain bedding.
